The KeyMacro app is an intelligent tool for controlling other Macs, PCs, and iOS devices. This app is capable of controlling virtually any application, task, or device on your PC. Additionally, KeyMacro can capture your keyboard and mouse input as well. The goal of the app is to provide complete control over the Mac OS. To accomplish this, the KeyMacro app comes with a full suite of custom macros and gestures. Features: Virtual Keyboard & Mouse: The virtual keyboard and mouse is one of the most significant functions that KeyMacro offers. While you have the ability to use the built-in keyboard and mouse, you can also use your iPad or iPhone as a virtual keyboard. If you don't like the built-in keyboard, just flip the iPhone over to use the virtual keyboard. The app is compatible with Bluetooth mice, as well as Logitech, Microsoft, and USB mice. Virtual Mouse Gestures: The virtual mouse gestures in KeyMacro are widely customizable. If you prefer using your

device as a trackpad, then you can create mouse gestures by pinching and swiping. Your trackpad can also be flipped horizontally or vertically to work as a more traditional mouse. You can even control the movement of your trackpad by using your finger to rotate the screen. Virtual Keyboard Gestures: Virtual keyboard gestures allow you to create custom text shortcuts and customize your keyboard. If you don't want to use the virtual keyboard, then you can easily switch back to your physical keyboard by using keyboard shortcuts. Custom Macros: The KeyMacro Macros app is the best tool for creating advanced macros. Macros are meant to speed up your routine tasks. In order to create macros, you'll have to learn how to edit a few templates. You can create text macros or create a template that will automate any device. You can then save these macros to your Mac's Macros directory. The more complex macros can be customized to change the text, change the applications, or even bring up different screens. Keyboard Shortcuts: With KeyMacro, you can create shortcuts that can be used with other apps. To create a shortcut, all you have to do is locate the app and then create a keyboard shortcut. You can also change the keyboard shortcut by using the shortcut editor. Virtual Assistants: The KeyMacro Assistants allows you to record and store your voice mail. The voice mail can be created by sending a URL. Alternatively, you can create a voice mail to 1d6a3396d6

The SEGA Mega Drive Mini, often simply referred to as the SEGA Mega Drive Mini, is a miniature version of the Mega Drive, released as a launch title for the original PlayStation 3. It was released worldwide on September 27, 2013 and in North America on October 2, 2013. It retailed for US \$39.99 in North America and NZ\$69.99 in New Zealand. The Mega Drive Mini includes a selection of the original game library and associated soundtracks (minus the Super Skirball, which was cancelled in North America) and also includes various on-disc extras, including the "Legacy Pack" which includes Mega Drive-themed PS3 games. All of the included games are accompanied by a new set of Classic Controller-compatible Classic Controllers and the console also comes bundled with a DVD with classic games and demos. A SEGA Mega Drive System and either of two game cartridges are not included in the packaging, although the latter can be purchased separately. The Mega Drive Mini is region-free, allowing the player to play games from any region.

Sony Ericsson Xperia Mini
Sony Ericsson Xperia Mini is an Android smartphone produced by Sony Ericsson, introduced in January 2012. The smartphone was originally launched as a part of Xperia Mini Pro series of mobile phones, where its initial specifications were on par with many smartphones released that year. Xperia Mini was launched in Singapore as Xperia Mini Pro without the "Pro" moniker, and was later launched in Malaysia as Sony Xperia Mini Pro. Xperia Mini was released in Singapore as Xperia Mini Pro without the "Pro" moniker, and was later launched in Malaysia as Sony Xperia Mini Pro. Xperia Mini was made available in Malaysia in November 2012, and was the cheapest smartphone in Malaysia at RM699 (US\$198), priced below most of the local smartphones in the country at that time.
