

I have a Lenovo A6010. Now I'm using RR 5.8.3 Android 7.1.2 x32, installed from the Russian forum w3bsit3-dns.com. Flashed 32-bit firmware from TWRP 3.0. All updates, including Russian translation, are installed using the SP Flash Tool. Lenovo A6010 has several points that are annoying and interfere with the normal use of the smartphone. 1. I can't use navigation programs normally - the navigator does not automatically determine the position (when connected to the Internet via mobile Internet), and in "Google Maps" I can not get directions in one place, since it is not laid.
