Les prÃ©sentes Conditions GÃ©nÃ©rales de Vente (ci-aprÃ¨s Â« C.G.V. Â») s'appliquent aux relations entre, d'une part, le Client (le Â« Client Â») agissant soit Ã titreÂ .Optimized spectral band-pass filters in infinite resolution Fourier optics. Optimized spectral band-pass filters are considered in the context of exact or approximate Fourier optics. A new numerical optimization algorithm is presented that maximizes both insertion loss and the width of the transmission passband. This algorithm is compared with others using the GOOSB model to predict performance. The optimized filters are then examined for cases in which they are operated in finite or infinite resolution Fourier optics. In the finite resolution case, the results show that, in contrast to conventional filters, they yield a more precisely controlled separation of an attenuating system from a high frequency system than is possible with conventional filters. In infinite resolution, we show that the optimized filters can be used to separate an attenuation system from a high frequency system by use of a Fourier filter system. The relative merits of the optimization algorithm and of infinite resolution are discussed. b e 3 - 5 / (5 / 7 7 2) .
