Table of Contents: 1. Red Riding Hood, your friend? 2. We are in the forest 3. In the forest, we met a pretty young maiden 4. A pretty, beautiful girl 5. Be careful, don't go there 6. The forest where the wolf howls 7. Something is hidden there 8. We will find something interesting 9. You're in the wrong place 10. Do not touch that 11. Should I come closer 12. The wolf. He has a red mouth 13. Beware 14. Perhaps he will speak 15. Listen carefully 16. He pulled a red hood 17. Look! 18. Under the hood, something moves 19. What am I hiding in my pocket? 20. After you, it's up to you 21. This is how he looks like in the game 22. He has a purse under his robe 23. In my pocket, he has a red 24. Was I a wolf? 25. What does he want with me? 26. Why does he look like a wolf? 27. That was not a wolf? 28. If not the wolf, then who was it? 29. He pulled a red hood 30. Can it be a bear? 31. I'll come closer 32. It's true 33. Was I standing? 34. He is a bear 35. It's not a bear, it's a wolf 36. This is scary 37. He stares at me like a wolf 38. Were his eyes green? 39. What do we do now? 40. He wants a bite 41. He wants a bite 42. We do not understand 43. What does it mean? 44. Do you think I'm a wolf? 45. I have an idea 46. I will touch it 47. I'm not a wolf 48. Yes, he is a wolf 49. Oh, dear 50. It's true 51. He does not want to get in our way 52. He is not a wolf 53. He wants to eat us 54. He's a bear 55. I don't trust him 56. He wants something 57. He can tell 58. Do not be scared 59. I think it's a good idea 60. I'm going to look 61. d41b202975

New puzzle mode - Pictures and surprise gameplay: - with the help of the full power of new pictures, the game will become more difficult - how to beat the puzzle? Guess new picturesQ: How to create Java generic class in Eclipse? I'm trying to create a generic class with three parameters inside it and I'm using Eclipse. How can I do this and how can I call the method from another generic class or the main one? A: Say you have generic class MyClass which has two fields. One is of the following type Object, and the other is of the following type MyClass. Now you would instantiate this class like so: MyClass var1 = new MyClass(); MyClass var2 = new MyClass(); MyClass var3 = new MyClass(); You could call the methods like so: var1.getObject(1, "Hello"); // 1 as the first input and "Hello" as the second var2.setObject("Hello", 1); var3.setObject(new Object(), 1); If you now wanted to create an Object of the above type, you could do so like so: Object var = new Object(); You could then call the methods defined on this class like so: var.getObject(1, "Hello"); // 1 as the first input and "Hello" as the second You can read more about how to do this in the following article: Q: Sorting in Prolog I have a list of integers [1,2,2,3,3,4,4,5,5,7,7,8] and I'm trying to add up all of the numbers in the list but I want to keep this list in the order that they appear in the list. This is what I have done so far : sum(List, Result) :- lists:foldl( (

**What's new:**

Description From Studio Valentino - The very first soundtrack for a nonogram game is finally here! Utilizing the challenge of a sprite-based puzzle game and tons of music, this track is aimed towards anyone looking to challenge themselves in the digital realm. Only a select few will take part in a secret sound competition that lasts four weeks, but all who complete it will receive their share of the Best Soundtrack Award. A short introduction message is given after every puzzle: "It is dangerous to walk alone... Run!" Using music, flowers, vines, trees, bushes, and other woodland items, each track is a dynamic and varying puzzle. A few of the tracks even include wassailing, a musical technique that isn't typically utilized in music. Contestants must find their own music in their surroundings and effectively tell their story with as little words as possible. If you ever find yourself perplexed or confused with the concept of making music for a simple nonogram, this is the event to showcase your skills as a digital musician. Description Ulimately good for nonogram lovers. It's similar to the Popanoids series, but with more popular songs for example. Contestant works very hard to complete his tasks in the code, most puzzle are fairly straightforward, but the music is harder here to predict, with a handful of lyrics that help to contribute to the puzzle. The winnings however is great. Description Game was created by keyQ and it's been around for long time now. Categories and Keywords, are to get stuck in a similar pattern. The focus of the contest is to keep the contesting spirit while keeping elements of good puzzle, in order to attract more people to the event. Drawbacks are not clear, but it seems to be hard to have fake attempts with same sets. Looking forward to next nonogram event! About the theme Description Intriguingly great game. Each player has the same goal: to direct a traveling cat in order to search for cat food. To do so, they need to use lines of different shapes to chase the cat, and find it's needed food in time. Entrants to the music contest must listen for inspiration in the environment around them -- the trees, flowers, and other creatures in the forest -- to compose a short piece of music. Then they must
