Below are the highlights of what you can expect from “HyperMotion Technology”: - Intuitive and highly responsive controls that adapt to your touch - Enhanced gameplay intelligence to make your player’s movements and style of play perfectly match each other - Immersive presentation - New animated team celebrations - Dynamic, responsive ball physics with more touch and control than ever before - & more FEATURES: BETTER MOBILITY - For the first time, controls have been revised to provide a more immersive and responsive experience. For example, you no longer need to tap to change direction but simply move your controller. That makes the game feel lighter and easier to control. - Further improvements to “Motion Match” also give you the ultimate intuitive and highly responsive controls which adapt to your touch. BETTER CUSTOMIZATION - For the first time, the unique player-first design strategy has been enhanced to enable players to seamlessly unlock your entire customization collection from the get-go. Start playing and follow the tutorials or just jump in and play without any fiddling. - With player-first design, the best players on your team are the ones that will thrive in your fantasy and online matches, especially on long journeys in FIFA 22. BETTER ROSTER - The 20th anniversary roster selection process is fully integrated with player-first design. Instead of picking from a pre-set selection, players appear in the game as if they have been drafted by you. Put together an all-new team, customise your players and fit your strategy to the type of game that you want to play. - In addition to choosing players, the game is more dynamic in when players become available. On passing through the turnstiles, they appear immediately in your Fantasy Team, and you can use your in-game coins to purchase players immediately. If a player is at the end of a long transfer process, however, he won’t appear immediately in the squad. BETTER COACHING - First and foremost, “Intelligence in Play”, a key feature in FIFA, introduces two new graphics elements in FIFA 22, the Foam Card and the Curve Card. These graphics elements, which enable new and improved functionality, let you check the match situation and view the key
